Component Spec Properties

All properties in the Component Spec are Raw Properties and were derived from the device datasheet[1]. The Raw Properties are intended to match the ICs hardware registers exactly.

Worker Interfaces

pca9534.hdl

Type	Name	DataWidth	Advanced	Usage
RawProp	rprops	-	Master=true	Raw properties connection for slave I2C device worker
ControlInterface	-	-	Timeout=131072	Control clock cycles required to complete property read/write. I2C transactions require additional clock cycles to complete than the default of 16

Control Timing and Signals

The PCA9534 HDL device worker uses the clock from the Control Plane and standard Control Plane signals.
